## **"Maths in Motion" at Shrewsbury High Prep School**

Four of our gifted and talented year 5 mathematicians (Jacob B, Brandon, Muhammad and Riley) were invited to participate at this competition. The day was organised to encourage children to consider a career in engineering as there is a shortage of mathematicians forging careers in engineering in the UK.

There were seventeen teams participating from all over Shrewsbury competing against each other in a Grand Prix race all hoping to become 'Shrewsbury Primary School Champions'.

The rules of the Grand Prix were simple! Get the maths right, make the correct decisions and you were in with a chance of winning the race! Get the maths wrong, you risked crashing your car, blowing up the engine or not even making it to the starting line! The children had to consider the weather conditions, calculate fuel consumption and how many pit stops were needed.

The activities involved a wide range of mathematical skills, including percentages, multiplication, division, angles, measuring and working together as a team, to find the best strategies to win the race. Some of the work was considerably difficult but with a little help and encouragement HJS worked together to problem solve.

After a few practice runs, HJS started in position nine on the grid. We moved swiftly to position six, then third. HJS were very excited at this point, seeing some of their competitors crash or engines overheating!

Then next, after lap 20 (52 laps in total) HJS moved into first place. We were very excited especially when we held on to win the Grand Prix to become Shrewsbury Primary School Champions!

We are very proud of the year 5 boys who attended and would like to congratulate them on their achievement and for all the hard work they put in on the day.
